

Tools to make you look as good as the shower does.

The installation jig sets the bracket layout. The cutting kit covers every cut you'll make on site. Carry both for a fast, consistent install every time.

TOOLS FOR PROFESSIONAL INSTALLERS

Two accessory kits to make installation a breeze

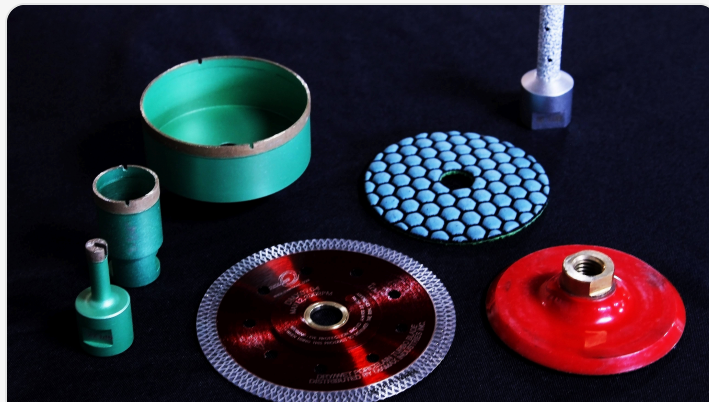

INSTALLATION KIT

Brackets without the guesswork

An adjustable aluminum jig sets every bracket at the right height, on the right stud, the first time. Pairs with the matched epoxy applicator for the panel bond joints.

IN THE KIT

- Vertical aluminum jig, adjustable 34"-60" with optional joining plates for height
- Epoxy applicator gun for 250 ml, 10:1 cartridge

CUTTING KIT

Every cut, clean and consistent

The blades, bits, and pads matched to Touchstone panels. Everything mounts to a standard 5/8"-11 angle grinder — fixture holes, niche cutouts, and trim cuts, all from one setup.

IN THE KIT

- 5" porcelain cutting blade
- Core bits — 3/8", 1 1/4", 3 1/2" — plus finger bit
- 4" backer pad and 4" dry diamond polishing pad
